## 目 录

|                                                                                                                                                            |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>新能源汽车集成式变速箱刚强度分析方法的研究</b><br><b>Research on Stiffness and Strength Analysis Method of Integrated Gearbox of New Energy Vehicle</b>                      |     |
| 赵泽西, 靳龙, 黄振之, 谢玉琳, 陈波铭.....                                                                                                                                | 577 |
| <b>涡流传感器在前沿工程技术领域的应用综述</b><br><b>Summary of the Application of Eddy Current Sensors in the Frontier Engineering Technology Fields</b>                      |     |
| 李世震.....                                                                                                                                                   | 585 |
| <b>大流量低扬程循环水养殖工船取水泵水力设计与分析</b><br><b>Hydraulic Design and Analysis of Large Flow and Low Head Breeder Ship's Intake Pump</b>                               |     |
| 赵雷刚, 杨勤, 方敏.....                                                                                                                                           | 594 |
| <b>机床主轴滑动止推轴承结构设计与性能分析</b><br><b>Structural Design and Performance Analysis of Machine Tool Spindle Sliding Thrust Bearing</b>                             |     |
| 周振伟, 宋佳欣, 陈辅强, 王城阳, 林晓亮.....                                                                                                                               | 604 |
| <b>液舱透气管路防冻伴热系统方案研究</b><br><b>Study of Anti-Freeze Tracing System for Liquid Tank Ventilation Lines</b>                                                    |     |
| 尹海波, 邵朱芸, 吴子丞, 柏逸超.....                                                                                                                                    | 613 |
| <b>基于离散点的曲面喷涂路径规划研究</b><br><b>Research on Path Planning of Curved Surface Spraying Based on Discrete Points</b>                                            |     |
| 陆子昂, 孙玲, 张远.....                                                                                                                                           | 621 |
| <b>一种新型三维力传感器结构设计与优化</b><br><b>Design and Optimization of a Novel Three-Axis Force Sensor</b>                                                              |     |
| 郭飞, 卢朋, 李立建.....                                                                                                                                           | 635 |
| <b>薄壁零件加工残余应力变形预测及控制技术研究现状</b><br><b>Research Status of Residual Stress Deformation Prediction and Control Technology for Thin-Walled Parts Processing</b> |     |
| 段士伟, 李萍, 康敬波, 崔敏超, 池亚达.....                                                                                                                                | 647 |
| <b>干热干冷环境对车用易熔合金影响研究</b><br><b>Study on the Influence of Dry Hot and Cold Environment on Vehicle Fusible Alloys</b>                                        |     |
| 詹志炜, 韩艳.....                                                                                                                                               | 660 |

|                                                                                                                           |     |
|---------------------------------------------------------------------------------------------------------------------------|-----|
| <b>臂架驱动双纽线型起重机变幅特性分析的解析方法</b><br><b>Analytical Method of Luffing Character of Lemniscate Type Crane with Boom-Driving</b> |     |
| 李克勤, 姜翠香.....                                                                                                             | 665 |
| <b>工业机器人大臂多目标拓扑优化</b><br><b>Multi-Objective Topology Optimization of Industrial Robot Arm</b>                             |     |
| 王长浩, 秦强, 刘伟.....                                                                                                          | 675 |
| <b>一种菌落识别器的结构设计</b><br><b>A Structural Design of a Colony Recognizer</b>                                                  |     |
| 王思佳, 李小虎, 王焕云, 谭建宝, 马智超, 陈海伦, 褚澳, 周仁宇, 黄彪.....                                                                            | 686 |
| <b>LNG 半自动化装卸臂应用研究</b><br><b>Application Research of LNG Semi Automatic Loading and Unloading Arm</b>                     |     |
| 吴斌, 王勇, 潘旭冉, 郑元杰, 宋新伟.....                                                                                                | 699 |
