## 目 录

|                                                                                                                                                                             |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 低渗砂岩油藏水驱开发规律物理模拟研究<br>Physical Simulation of Water Drive Development in Low Permeability Sandstone Reservoir<br>蒲泓丞, 吴居林, 吴柏宣 .....                                         | 461 |
| 细胞分裂素转运蛋白在细胞分裂素平衡和信号分布中的作用<br>Role of Cytokinin Transporter Proteins in Cytokinin Homeostasis and Signal Distribution<br>曹文强 .....                                          | 471 |
| 2000~2019 年东北地区积雪物候时空变化<br>Spatiotemporal Changes of Snow Phenology in Northeast China from 2000 to 2020<br>谷嘉凯 .....                                                       | 483 |
| 三种常用抗凝剂处理血液样本后 DNA 提取方法探讨<br>Discussion on the Extraction Method of DNA from Blood Samples<br>Treated with Three Common Anticoagulants<br>周倩, 黄仁武, 曾逸飞, 刘林林, 聂胜洁, 胡利平 ..... | 490 |
| 2017~2022 年韩城市土地利用变化分析<br>Land Use Changes in Hancheng City from 2017 to 2022<br>田渊, 王立廷 .....                                                                              | 498 |
| 滨海滩涂湿地现状及互花米草的生态机制研究进展<br>Research Progress on the Current Situation of the Wetland and the Ecological<br>Mechanism of the <i>Spartina alterniflora</i><br>高媛 .....         | 505 |
| 小麦 <i>DUF760</i> 基因家族的全基因组鉴定与表达分析<br>Genome-Wide Identification and Expression Analysis of <i>DUF760</i> Gene Family in Wheat<br>李政, 徐鹏亮, 刘震宇, 范永胜, 吴涛, 胡宁, 蒋雯, 朱坤 .....    | 510 |
| LC-MS 在手性农药对映体分析中的应用<br>Application of LC-MS in Pesticide Enantiomer Analysis<br>王楠, 刘宇辉, 梁啸 .....                                                                          | 519 |
| 细胞的运动分布与空间结构基因<br>Cell Motor Distribution and Spatial Structure Genes<br>程洪文 .....                                                                                          | 524 |
| 基于水中 $\text{Cr}_2\text{O}_7^{2-}$ 传感器的制备及性能研究<br>Preparation and Performance Study of $\text{Cr}_2\text{O}_7^{2-}$ Sensor Based on Water<br>姜苗 .....                        | 530 |

|                                                                                                                                                             |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>塔河 12 区缝洞型油藏剩余油分布数值模拟研究</b><br><b>Numerical Simulation Study on Remaining Oil Distribution of Fractured Vuggy Reservoir in Block 12 of Tahe Oilfield</b> |     |
| 冯小龙 .....                                                                                                                                                   | 536 |
| <b>贵州黎平地区沼水蛙的分子鉴定</b><br><b>Molecular Identification of a <i>Sylvirana guentheri</i> Population Distributed in Liping County, Guizhou Province in China</b> |     |
| 冯权江, 李明, 汪莎莎, 何婉琴, 符静, 熊荣川 .....                                                                                                                            | 551 |
| <b>城市公共空间雨水径流的景观化循环利用策略</b><br><b>Landscape Design Research on Rainwater Runoff Recycling in Urban Public Spaces</b>                                        |     |
| 王皖杰, 肖栋, 谢圣楠, 任雨轩, 张军, 郝云涛 .....                                                                                                                            | 561 |
| <b>六盘水市落别乡大樱桃开花期的不利气象条件分析</b><br><b>Analysis of Adverse Meteorological Conditions of Large Cherry Flowering Period in Lube Township, Liupanshui City</b>    |     |
| 龙园, 彭超, 徐仁慧, 耿克思, 丁江 .....                                                                                                                                  | 571 |
| <b>浅层地下水水化学特征及来源分析</b><br><b>Hydrochemical Characteristics and Source Analysis of the Shallow Groundwater</b>                                               |     |
| 高懿凡, 马杰, 冯松宝, 周洁, 张惜梦, 沈孝珂, 郑玉山, 汪定圣, 张子鹏, 王富 .....                                                                                                         | 578 |
| <b>1990~2021 年马鬃山气温变化特征分析</b><br><b>Characterization of Temperature Change in the Mazong Mountains from 1990 to 2021</b>                                    |     |
| 何俭翔 .....                                                                                                                                                   | 585 |
| <b>国控断面水质变化趋势分析预测研究</b><br><b>Analysis and Prediction of Water Quality Change Trend of National Control Section</b>                                         |     |
| 汪浩, 杨君, 陈盈 .....                                                                                                                                            | 592 |
| <b>小麦秸秆生物炭对水中对乙酰氨基酚的吸附性能研究</b><br><b>Preparation of Wheat Straw Biochar for Acetaminophen Adsorption from Aqueous Solutions</b>                             |     |
| 阮兰芳, 刘星雨, 付敦 .....                                                                                                                                          | 601 |
| <b>高密度电法常用装置与融合装置对比</b><br><b>Comparison between Common Devices and Fusion Devices of High-Density Electrical Method</b>                                    |     |
| 代铮, 郭皓雨, 张月, 田超, 山显磊 .....                                                                                                                                  | 609 |
| <b>2016 年 11 月 4 日华北地区大范围平流雾过程分析</b><br><b>Analysis of Large-Scale Advection Fog Process in North China on November 4, 2016</b>                             |     |
| 陈昭仔, 韩羽庭, 季成海, 程朱文溪 .....                                                                                                                                   | 618 |
| <b>神经网络在气象领域中的应用</b><br><b>Application of Neural Network in Meteorology</b>                                                                                 |     |
| 张珂珺, 金旭峰, 牛海林, 吕艺影, 陈丹丹, 熊雪清 .....                                                                                                                          | 624 |

**酰肼类荧光探针的设计合成及其性质研究**

**Design, Synthesis, and Properties of Acylhydrazone Fluorescent Probes**

李金国, 麻建飞 ..... 635

**遵义市播州区春季一次大冰雹天气成因分析**

**Analysis of the Causes of a Large Hailstorm in Spring in Bozhou District, Zunyi City**

肖雨霞, 张艳梅, 罗阳欢, 吴新星, 刁金粉, 申俊初 ..... 648

**莲子心中三种主要生物碱在大鼠体内代谢产物的鉴定**

**Identification of Metabolites of Three Main Alkaloids in Lotus Seed in Rats**

贾楠, 蒋寒蕊, 孙悦, 王欣怡, 吕晶 ..... 657
