

TABLE OF CONTENTS

目 录

The Research on Time Synchronization Technology for Smart Power Grid

(面向电力通信网的时间同步应用技术研究)

Z. H. WU, Y. F. HUANG, G. XIONG, X. M. TONG.....1

Based on Surface Pro Angle Stability of Power System Simulation Analysis

(基于 Surface Pro 的电力系统转角稳定性仿真分析)

Z. R. NI.....7

Application Research of Communication Technology for Intelligent Monitoring of Transmission Line

(输电线路智能监测系统通信技术应用研究)

D. C. ZOU, K. H. LI, B. R. CHEN.....11

Research on the Method of Calculation for Wheeling Cost of Power Flow Based on Power Markets

(基于电力市场的过网费用计算方法研究)

Z. M. LI, Y. YU, W. T. ZOU.....16

Research on Life-Cycle Reliability Costs of Transmission Lines

(输配电线路全生命周期可靠性成本研究)

M. J. LI, Y. Q. OU, D. H. CAI, S. J. MO, H. Y. SHEN.....21

Study and Practice of Large Heating Units Deeply Involved in Peak-Load Regulation Capacity of

Power Network

(大型供热机组深度参与电网调峰能力的研究与实践)

C. G. TIAN, L. S. CHU, X. Y. LV, T. DONG, D. X. LI, X. J. HAN.....26

Selection of Optical Fiber Communication Technologies for Distribution Network

(智能配电网光纤通信技术选择)

M. WANG, Y. Q. ZHONG, B. R. CHEN.....31
